DeFi also refers to a variety of peer-to-peer financial services that permit crypto trading, loans, interest accounts, algorithm-driven cross platform trading and other services.

DeFi empowers everyday investors to access new asset types, earn yield, reduce their fees, improve their rates, and all around take more control over crafting their financial future.
Our Secure Validation Infrastructure

The blockchain is maintained over a diverse and geographically distributed network of different computers or servers.

- Validators run the infrastructure
- Validators earn staking rewards & fees
- Delegators earn a return on their assets
- Delegators contribute to the security
